Machine Learning with Watson Studio (Masterclass)

Masterclass on Machine Learning where Ibmer will guide you through a series of tasks designed to empower adult learners with practical machine learning skills and collaborative problem-solving techniques.

Learn about IBM Watson Studio

- Set up a machine learning project in IBM Watson Studio
- Create a Cloud Object Storage resource
- Build an AI model using AutoAI in IBM Watson Studio
- Run a prediction experiment for an AI model
- Implementation in notebook in Jupyter Notebook (.ipynb) format

Benefits

- Acquire programming, domain-specific skills, and software expertise.
- Expand your professional network and earn globally recognized SkillsBuild badges.
- Convert your learning into demonstrable projects for potential employers.
- Transform your learning into a tangible showcase for future employers.

Dates: 24th June 2024

Time : 2 hours
